NEWS RELEASE

August 28, 2007

TINKA ANNOUNCES POSITIVE INITIAL DRILL RESULTS AT COLQUIPUCRO, PERU

Including 10m grading 625 g/t Silver and 28m grading 105 g/t Silver

Vancouver, Canada - Tinka Resources Limited (the "Company") (TSXv - TK; Frankfurt - TLD; Pinksheets - TKRFF). Mr. Andrew Carter, President & CEO, provides the results of the first four drill holes of an eleven hole diamond drill exploration program currently underway at the Company's 100% owned Colquipucro silver project, west-central Peru. Three holes have targeted known surface and underground mineralization along the westernmost section of the program area, and one hole targeted known surface mineralization one hundred metres to the east.

Said Mr. Carter: "The initial assay results from Colquipucro are very encouraging and we look forward to the continuation of this program. The results from CDD4 are significant as it is the first opportunity the Company has had to test along strike from the adit area. The new drill contractor is currently drilling hole 6 and is proceeding very satisfactorily."

Drilling results are as follows:

HOLE NO.	SECTION	FROM m	TO m	TOTAL m	Recovery %	Silver g/t	Lead %	Zinc %
CDD1	332600E	0	4	4	72	154	0.4	nil

		180	184	4	34	38	0.2	0.7

All intercepts are down-hole lengths and true widths have not been calculated. A 30 g/t cut-off has been used for silver and a 0.1% cut off for lead and zinc. It should be noted that badly fractured ground has caused poor core recovery in a number of sampled intervals.

All diamond drilling has been performed using HQ and NQ diameter core. Core is logged and split on site under the supervision of Tinka geologists. Sampling is done on two metre intervals and samples are transported by company staff to Plenge Laboratories in Lima, Peru for assay by multi acid digestion method. The Company has continued a program of randomly inserting known sample standards as a means of checking on laboratory analytical reproducibility. Random samples were also transported to IPL Laboratories in Vancouver for check analysis. Results from the quality control program are within acceptable limits.

The Company's Qualified Person as defined in National Instrument 43-101, John Nebocat (P.Eng.), who has visited the drill site to both observe the drilling and sampling procedures, has reviewed and approved the contents of this press release.

On behalf of the Board,

"Andrew Carter"

Andrew Carter, President & CEO
