NEWS RELEASE

December 5, 2005

TINKA STAKES NEW COPPER PROJECT IN SOUTHERN PERU

Vancouver, Canada - Tinka Resources Limited (TSXv - TK; Frankfurt - TLD; Pinksheets -TKRFF).

Mr. Andrew Carter, President, is pleased to report that the Company has staked an area of intrusive-hosted copper mineralization located along the coastal batholith in the Ayacucho department and province of Lucanas, Peru. The 3,000 hectare Tibillos property was identified by Tinka through the exploration alliance with Sierra Peru Pty Ltd. (“Sierra Peru”) announced June 1, 2004.

Recent reconnaissance work yielded stream sediment and grab rock samples anomalous in copper from an area underlain by quartzite and andesite porphyry intruded by diorite and granodiorite. Further detailed mapping and sampling will be conducted shortly.

The Tibillos property lies within a belt along the coast of Peru which contains several porphyry copper deposits.

The Company’s Qualified Person, John Nebocat, P.Eng., has verified the contents of this news release.

On behalf of the Board,

“**Andrew Carter**”
Andrew Carter, President & CEO
